

# 8th CIRP IPSS CONFERENCE

## Product-Service Systems across Life Cycle

# 2016

## 20-21 June, Bergamo (Italy)

***Dr. Mohamed-Zied Ouertani*** (ABB Corporate Research, Germany)

Zied is a Principal Scientist in Industrial Service Management at ABB Corporate Research Centre (CRC) Germany. He currently leads several R&D projects in the IoTSP context focusing on analytics, service engineering and business model innovation for the power and automation industry. Prior to joining ABB, Zied has been with the University of Cambridge as a Postdoctoral Researcher and member of the Distributed Information and Automation Lab (DIAL) at the Institute for Manufacturing, the Cambridge Auto-ID Lab and the Cambridge Service Alliance. Zied lead several projects funded by the UK EPSRC funding agency as well as industrial-funded projects providing consultancy to industries such as IBM, BAE Systems, Caterpillar and ExxonMobil. He also supported the Cambridge University's Institute for Manufacturing and the Judge Business School in lecturing undergraduate and postgraduate programmes. Zied, who has been awarded a Université Henri Poincaré (Nancy, France) scholarship for postgraduate studies, obtained a Ph.D. in Information Systems in 2007 and holds a Master of Science in Production Automation jointly from Université Henri Poincaré and École Normale Supérieure de Cachan (Paris, France).
